SUMMARY

Computer Science recent graduate with a strong foundation in software engineering and programming principles across multiple platforms. Professional experience of product analysis and support in a fast-paced environment, seeking an entry-level opportunity as a software developer in an Agile product team.

EXPERIENCE

Product Analyst

CMiC | North York, Ontario | February 2022 - February 2023

- Understood client requirements and offered solutions consistent with their vision for prompt resolution maintaining a **satisfaction rating of over 95%.**
- **Documented** functional, security, operations and performance requirements for software tools, and implemented changes to improve usability and functionality of the software.
- Collaborated with **programming, IT, and DBA** teams to **test and troubleshoot** system scenarios, identifying and resolving complex issues related to software development.
- Assisted in **Integrating CMIC's software** with various CPM platforms, document management systems, and other third-party tools using APIs and SDKs.
- Provided daily support to clients, responding within **15 minutes** to over **400 tickets** and independently resolving issues, resulting in a **20% increase** in customer retention.

PROJECTS

My Portfolio Website:
React.js, Material UI, HTML, CSS, JavaScript, Git
- Developed and hosted a modern and responsive portfolio website to showcase projects.
- Employed various tools like **React Icons, Hooks and Router** using React.js and various components like a **navbar, hero section, cards and buttons** using Material Ui to enhance the functionality and ensure a consistent user-friendly interface.
- Used Git and GitHub for version control to ensure organized and maintainable codebase.

Daily Greetings:
HTML, CSS, JavaScript, Ajax, jQuery, REST API
- Created a personal organization app with dashboard functionality.
- Integrated multiple Open **REST APIs** to dynamically display real-time weather, inspirational quotes, and visually captivating backgrounds.
- Featured a user-friendly **to-do list**, enabling easy creation, viewing, and deletion of tasks.
- Utilized **jQuery** to simplify DOM manipulation providing faster, seamless user experience.
- Implemented efficient data caching using **Ajax** to minimize the overhead of repeated network calls and enhance performance.

Book Realm:
Java, Swing, JDBC, SQL, XAMPP
- Developed a robust **Java** Library Management System using **Window Builder library**.
- Implemented a **MySQL** database using **phpMyAdmin** and **XAMPP server.**
- Created a Signup and Login page to authenticate users and enable new user registration.
- Enabled the recording, retrieval, editing, and deletion of entries from the database.
- Incorporated **JDBC** for database connectivity and **Java Swing** for the GUI.

Snake Game:
Java, Swing, AWT, JPanel
- Built a classic 2D Snake Game in **Java** using **Swing framework**.
- Used **Java Abstract Window Toolkit** to design the Graphical User Interface of the app.
  Deployed the project as a **JAR file** to enhance code security and provide easy access.

EDUCATION

BSC. Computer Science
York University, Toronto, ON
February 2022

SKILLS

Languages: Java, PLSQL, HTML5, CSS3, JavaScript, Python, C, C++

Frameworks and Libraries: Swing, Express.js, React.js, Angular, jQuery, Bootstrap, Material UI

Database: MySQL, Mongo DB

Operating Systems: Windows, Linux, MacOS, Android

Collaboration: Git, Salesforce, JIRA, Confluence, VMWare, MS Teams

Other Technologies: SOAP/RESTful APIs, AWS, JUnit, XAMPP, Node.js, JSON, MS Server

Methodologies: OOP, DSA, SDLC, Agile, Scrum, DevOps

Also Familiar with: Flutter, Firebase, XML, Azure

CERTIFICATIONS

Advanced Full Stack Web Development
Coding ninjas
2021

Data Structures and Algorithms
Cipher Schools
2021
